

Further changes regarding the German road tax (MAUT), starting 2019-01-01.

Earlier this year, the German government decided to expand the German road tax to an extended road network.

On October 19th, a new decision was made to increase the tax rates, starting January 1st, 2019.

The tax increase is based on which type of vehicle you are driving. What matters will be the number of axles on the vehicle in combination with the environmental rating of the engine.

During 2017, 100% of our own and our subcontractor's trucks met the highest requirements of European Standard linked to EURO 5 or EURO 6.

We are currently working on forming new tariffs based on the new regulations.
